DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 10, 2008 has been entered.
2. Applicant's amendment and accompanying remarks filed May 22, 2008 are acknowledged.
3. Examiner acknowledges amended claims 1-3.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ise et al., U.S. Patent Number 6,962,755.

Ise discloses a light-emitting element comprising at least a light-emitting layer containing a light emitting material and a host material disposed between two electrodes (column 3, line 55-column

Art Unit: 1794

4, line 5). The reference discloses that the light emitting layer comprises a compound with the general formula (see column 13)

Isc reads on the present claims when n^A is 4; X^{A21} and X^{A24} are nitrogen; X^{A22} and X^{A23} form a

six membered ring; and L^A can be a bivalent group such as . Isc's general formula

A-II reads on present formulae VI in present claims 1-2 when a and c are zero; b is 1; and Ar^1

And Ar^2 are . The Isc reference also reads on instant claim 8 when the 2H-benzotriazole has the general formula IIIa.

Response to Arguments

6. Applicant's arguments filed June 10, 2008 have been fully considered but they are not persuasive. Although applicant has amended claims 1 and 10, b can 1 with a, c and d being zero, which reads on formula VI when n^A is 4 and X^{A22} and X^{A23} forms a six membered ring. Additionally, the Isc reference reads on the present claims when L is a phenylene group, which represents Y^3 . The rejection is maintained.
